

## NOTICE OF A PROPOSAL

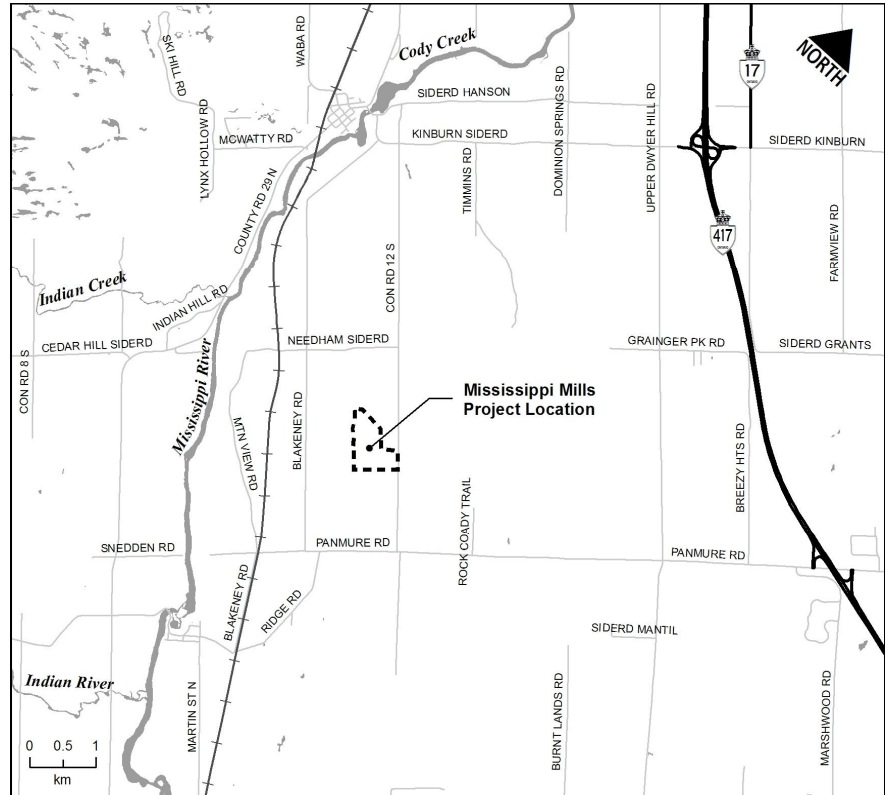

By Canadian Solar Solutions Inc., in Partnership with Saturn Power Inc., to Engage in a Renewable Energy Project  
**AND NOTICE OF PUBLIC MEETING**

**Project Name(s):** Mississippi Mills Solar Park Project  
**Project Applicant:** Canadian Solar Solutions Inc., in Partnership with Saturn Power Inc.  
**Project Locations:** The Project is located on the west side of Concession Road 12 S between Needham Sideroad and Panmure Road, in the Town of Mississippi Mills, County of Lanark

**Dated at the Town of Mississippi Mills this  
November 7, 2011**

Canadian Solar Solutions Inc., in Partnership with Saturn Power Inc., are planning to engage in a renewable energy project, which will require the issuance of a renewable energy approval (REA). The proposal to engage in this project and the project itself are subject to the provisions of the *Environmental Protection Act* (ACT) Part V.O.1 and Ontario Regulation 359/09 (Regulation). This notice must be distributed in accordance with Section 15 of the Regulation prior to an application being submitted and assessed for completeness by the Ministry of Environment (MOE).

The first Public Meeting is being held to provide initial information on the proposed project. The meeting will be an open house walk through format. You are welcome to attend at anytime during the hours indicated below. A second Public Meeting will be held at some point in 2012 to provide more detailed information on the proposed project.

### Meeting Location:

**Date:** Thursday, December 15, 2011  
**Time:** 6:00 pm to 8:00 pm  
**Place:** Almonte Community Centre – Upper Hall  
182 Bridge Street  
Almonte, Ontario

### Project Description:

Pursuant to the ACT and Regulation, the facility, in respect of which this project is to be engaged in, is a Class 3 Solar Facility. If approved, the facility would have a total maximum name plate capacity of 10 MW AC. The Project Location is identified on the map above. The Draft Project Description Report titled *Draft Project Description Report, Mississippi Mills Solar Park Project* provides an overview of the proposed Project including location, components, activities and potential negative environmental effects. The solar energy generating facility will utilize photovoltaic (PV) panels installed on a series of fixed racking structures. DC electricity generated from the PV panels is converted to AC electricity by a series of inverters. The voltage level of the AC electricity produced by the inverter is then “stepped-up” to distribution level voltages by a series of transformers and a substation and then connected to the local distribution system. Written copies of the Draft Project Description Report are being made available for public inspection at [www.canadian-solar.ca](http://www.canadian-solar.ca) and at the local Town Hall, Town of Mississippi Mills, 3131 Old Perth Road, Almonte, Ontario.
